

## MANUFACTURING MATTERS

Washington Manufacturing Services (WMS) is a statewide, not-for-profit organization with only one goal: to make Washington's manufacturers more successful. Through our educational programs, we strive to bring you the most current technical knowledge and to offer classes that will help your company be more competitive. Our project managers will help you with the next step - turning that knowledge into results at your company.

Call WMS at (425) 438-1146 today, or visit our web site at [www.wamfg.org](http://www.wamfg.org).

# Principles of Lean Manufacturing With Live Simulation

## Would you like to...

- Reduce manufacturing time by 50%
- Reduce work-in-process inventory by 50%
- Improve on-time shipments by 90%?

If you answered “yes” to any of these questions, this workshop is for you.

**Principles of Lean Manufacturing with Live Simulation (Lean 101)** is a one-day seminar that introduces Lean Manufacturing in a classroom discussion combined with live simulation sessions that demonstrate the Lean concepts learned in the lectures.

Lean Manufacturing doesn't require a large capital investment or increased human resources. In fact, it shows you how to do more with less - less capital equipment and

less floor space - by getting the waste out and replacing it with value-added processes. Adopting a Lean approach

is helping companies become faster and more responsive to customer requirements while using fewer resources.

In this introductory course, students will learn how to:

- Reduce cycle time
- Reduce floor space
- Reduce inventory
- Improve cash flow
- Improve productivity
- Stimulate teamwork

Your registration fee for this workshop is **\$299 per person** and includes lunch and course materials.

## ABOUT THE INSTRUCTOR

This workshop is taught by **Karl Webber**, President of Emergent Technologies. With over 15 years of experience in manufacturing, management and consulting, Karl Webber has helped many organizations achieve world class level improvements in productivity, quality, cost and space reduction. Having worked in all levels of organizations, he thoroughly understands the demands and challenges facing companies today.
